

Westside Residential Disposal & Recycling Centre/Landfill Closure News

November 2013

This is our monthly update on the operations of the Westside Residential Waste Disposal and Recycling Centre and on the progress of the landfill closure.

News and Information

Residential Waste Disposal and Recycling Centre

- During November, a new drywall containment area will be built as we split the existing clean wood disposal area into two areas.
- We remain extremely busy with residents dropping off excess yard waste. Please be patient as our staff tries to accommodate residents at this time of year. Loads weighing up to 250 kilograms and 20 centimeters or under in diameter may be disposed of, without charge. All materials dropped off are removed from the site, chipped and used as a soil nutrient enhancer.
- The Residential Waste Disposal facility is open Friday, Saturday, Sunday and Monday from 7:30 am to 4:00 pm. The gate closes at 3:50 pm to permit our last customers to unload materials. All residential loads must be covered during transport to the facility in order to prevent the spread of litter along our roadways.
- West Kelowna, Peachland, Central Okanagan West and Westbank First Nation reserve residents may drop off recyclables at the site seven days a week, 7:30 am to 4:00 pm.
- If you see any suspicious activities or people onsite after hours, please contact the RCMP by dialing 9-1-1.
- Use our online form to report an illegal dump site at regionaldistrict.com/recycle or contact the Regional Waste Reduction Office at 250-469-6250 or email recycle@cord.bc.ca.

Landfill Closure

- Several dead and unsafe hazard trees will be removed from the buffer area during November.
- We've received an indication from the Ministry of Environment that it is preparing to amend the Westside Landfill Operational Certificate PR 12217. This positive consideration comes after discussions between the Regional District, its consultants and staff with the Ministry of Environment regarding a Final Closure Plan and supporting documents that reflect no further discharges to the ground and management of recyclable materials.

Once Final approval is given by the Ministry to the Westside Landfill Closure Plan, we will proceed with scheduling and publicizing an Information Open House to highlight the plan and its key elements.

- We appreciate your continued patience and understanding over the past few years as we have been working to receive final approval from the Ministry. Just a reminder, since the landfill closed several years earlier than originally anticipated, we didn't receive the anticipated volume of material that would have provided sloping that is normally considered by the Ministry in a Final Closure Plan. As a result, we requested amendments to the Final Closure Plan that would take into consideration the existing sloping around the former landfill site.
