WESTSHORE ESTATES STAKEHOLDERS

Re: Crown Land Wildfire Risk Reduction Project

The Okanagan Shuswap Natural Resource District has initiated the development of a Fuel Management prescription in the Westshore Estates area. The intent of this fuel management project is to reduce the threat of wildfire in the immediate Wildland Urban Interface (WUI) surrounding Westshore Estates and the OKIB community. This project will also contribute to a larger landscape-level fuel break to protect the communities, resources, and infrastructure along Westside Road. Westside Road is a busy North/South corridor and is the main access road along the west side of Okanagan Lake.

The treatments will range from hand and mechanical thinning, manual pruning, and surface fuel removal including pile and burn, designed to open the existing dense stands to prevent the initiation and spread of crown fires. These treatments are anticipated to start January 2021.

A google earth file of the project area is available upon request.

Please direct any questions to Rhona Boyd at Rhona.Boyd@gov.bc.ca or by phone at (778) 943-7088.

Best Regards,

Rhona Boyd
